

EDA REPORT

Project 2 — Exploratory Data Analysis

DecodeLabs Internship | Batch 2026

Your Name: Arinze Chigozirim Glory

Date: June 2026

1. Introduction

This report presents the findings from an Exploratory Data Analysis (EDA) conducted on a cleaned e-commerce dataset of 1,200 orders. The goal was to identify patterns, trends and key business insights from the data.

2. Basic Statistics

Metric	Value
Average UnitPrice	356.41
Median UnitPrice	364.21
Average Quantity	2.94
Median Quantity	3.00
Average TotalPrice	1053.97
Median TotalPrice	823.62
Total Orders	1200

3. Key Findings

Product Analysis:

Printer was the most ordered product with 181 orders while Phone was the least ordered with 156 orders.

Payment Method:

Online payment was the most preferred method with 258 orders while Gift Card was least used with 230 orders.

Order Status:

Cancelled orders were highest with 250 orders. Only 231 orders were successfully delivered representing 19% of total orders.

4. Recommendations

Investigate why 41% of orders are cancelled or returned

Create promotions to boost Phone sales

Improve delivery process urgently

5. Conclusion

The analysis revealed serious operational challenges particularly around order cancellations and returns that require immediate business attention.
